

Coral Reef Coloring & Drawing Activity

Inspired by the work of Federico Uribe

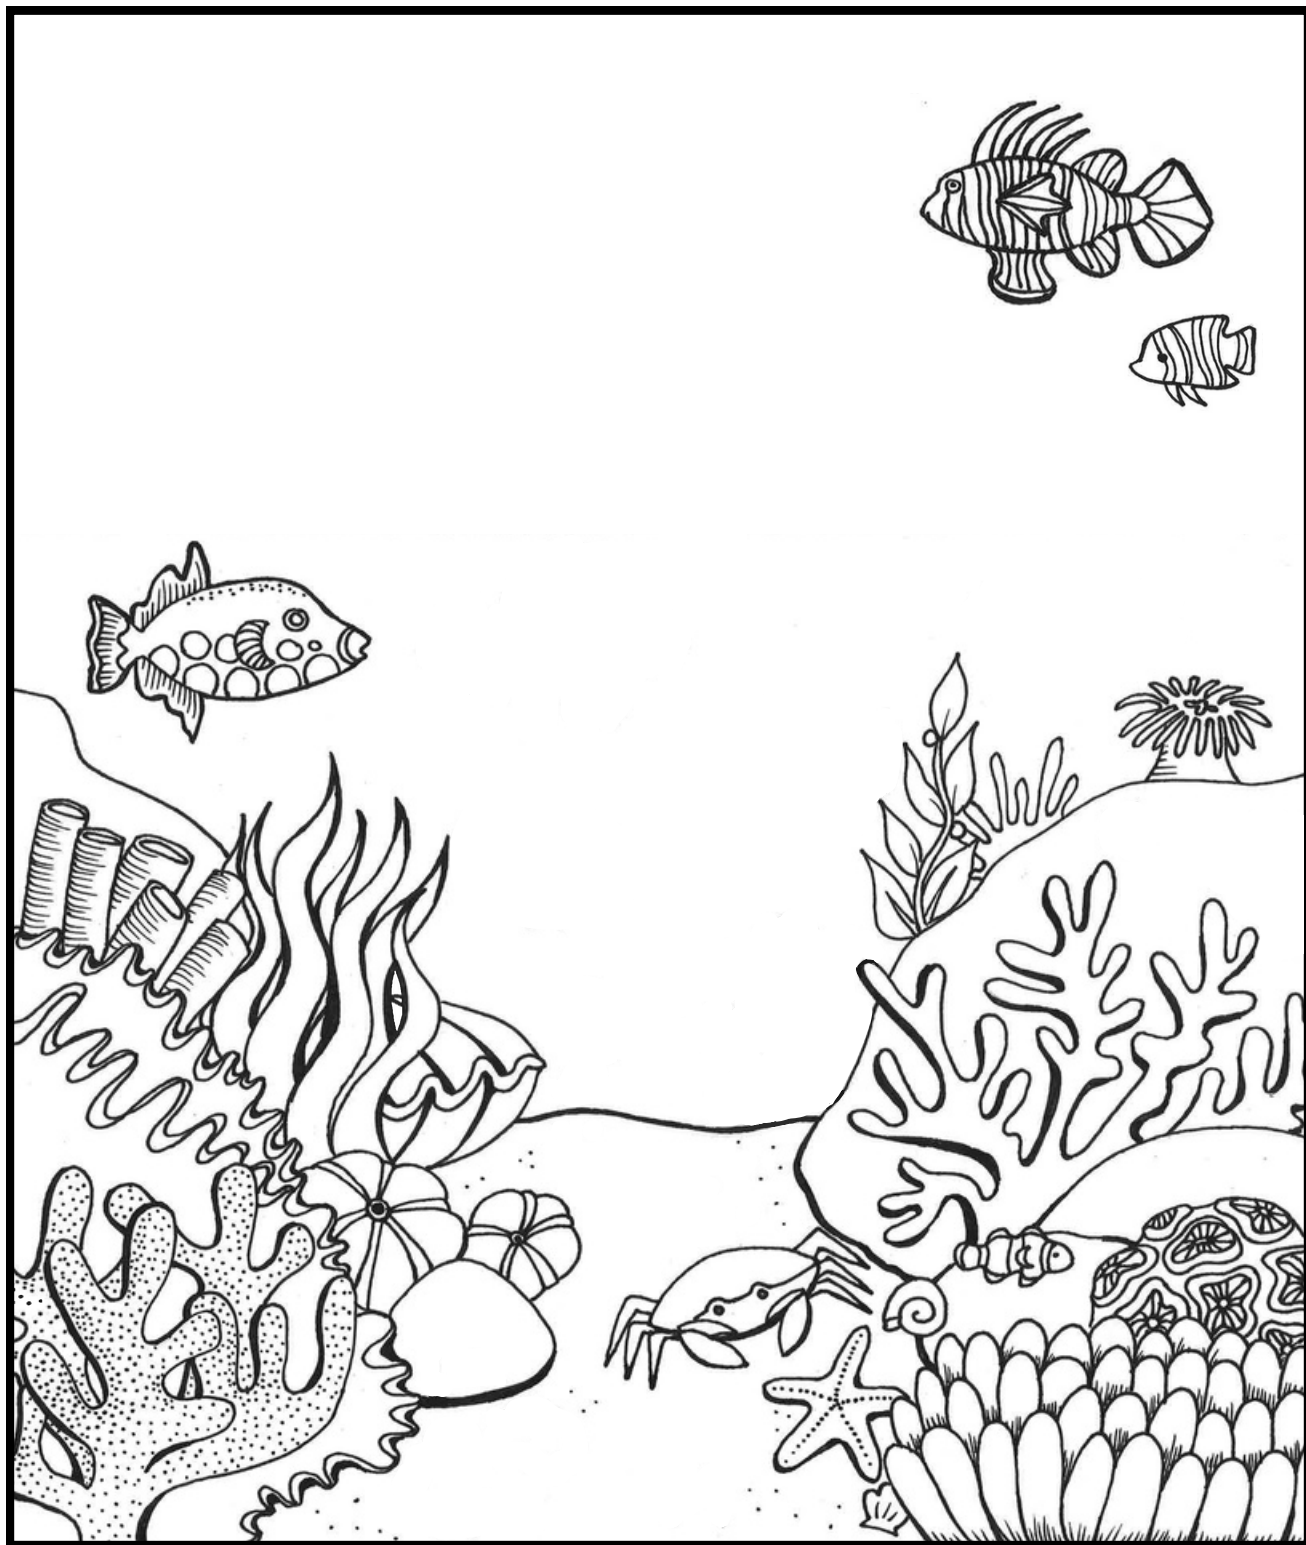

Installation view of Federico Uribe, *Plastic Reef*, 2018–23. Recycled plastic. Courtesy of MASS MoCA.

Federico Uribe is a Colombian artist who now lives in Florida. His playful sculptures and installations are made from repurposed materials. *Plastic Reef* (pictured above) is a room that is decorated entirely out of recycled plastics. Why do you think Uribe choose to use recycled plastics to make a coral reef scene?

Print out the coloring & drawing activity on the next page inspired by Federico Uribe's *Plastic Reef*.

Color in this coral reef using bright colors and draw your own sea creatures in the scene. Get creative and try making sea creatures out of everyday objects!

Federico Uribe: Metamorphosis / Metamorfosis
will be on view at MMoCA until May 26, 2024.
Admission is always free!
